Revolution Geosystems Announces Strategic Acquisition of Phoenix LiDAR Systems, Expanding Global Reach in Precision Geospatial Technology

[Huntsville, AL] — February 20, 2026 — Revolution Geosystems, a leader in comprehensive geospatial solutions, announces the successful acquisition of Phoenix LiDAR Systems, a pioneer in flexible survey-grade lidar mapping solutions. This strategic move unites two powerhouses in the industry.

The integration of Phoenix LiDAR Systems into the Revolution Geosystems family marks a significant milestone in the company's mission to provide "all-under-one-umbrella" services. By combining Phoenix's world-class hardware and software with Revolution Geosystem's aviation and equipment rental services, the acquisition bolsters Revolution Geosystems' services to support the geospatial market in three key areas:

Turnkey Hardware: Revolution Geosystems' expanded portfolio will now include Phoenix LiDAR System's turnkey hardware solutions for both manned and unmanned platforms, recognized for versatility and industry-first innovations, alongside proven mobile mapping technologies.

Advanced Data Processing Tools: With Phoenix's powerful software suite, Revolution clients gain access to a comprehensive software environment for mission planning, data processing, and analysis, helping reduce turnaround times and accelerate decision-making. This enables our clients to be even more efficient with the data they collect.

Enhanced Service Capabilities: The deal deepens Revolution's ability to provide a full-service ecosystem of equipment, software, and aerial acquisition services, ensuring clients have the exact tools they need for project success.

"This acquisition is a perfect alignment of strengths," said **Paul Rossouw, CEO of Revolution Geosystems**. "Phoenix LiDAR Systems has built a reputation for pushing the boundaries of what is possible in remote sensing. By bringing their turnkey integrated lidar payloads and experienced software development team into our family, we are offering our clients a deeper level of support and a more seamless path to geospatial data acquisition and processing than ever before."

"Joining forces with Revolution Geosystems allows us to scale our technology and reach a broader audience of professionals who need precision and reliability," said **Rob Dannenberg, CEO of Phoenix LiDAR Systems**. "We are excited to integrate our hardware and software expertise into Revolution's robust service model, ensuring our users continue to lead the way in their respective fields."

Current Phoenix LiDAR Systems customers can expect a seamless transition, with continued support for existing products and an expanded roadmap for future innovations.

ABOUT REVOLUTION GEOSYSTEMS

Revolution Geosystems is a premier provider of geospatial equipment and aerial acquisition services. The company offers its fleet of over 50 modern Cessna Caravans, Cessna 206H aircraft, sensor rentals, and a global equipment online marketplace to geospatial clients.

ABOUT PHOENIX LIDAR SYSTEMS

Phoenix LiDAR Systems offers a full line of turnkey, integrated lidar systems for unmanned and manned aerial acquisition, robust mobile mapping lidar solutions, and a full suite of planning, acquisition, and processing software.
